Performance Notes:

1. NCs are derived from sound power levels, which are obtained in accordance with AHRI Standard 880-2011 and ASHRAE Standard 130-2008.
2. NCs are derived from sound power levels which include duct end corrections per AHRI Standard 880-2011. Please refer to page F25 for more details.
3. Blank spaces (-) indicate NCs less than 20.
4. Asterisks (*) indicate minimum static pressure of the unit exceeds the minimum operating pressure across the unit.
5. Air flow is given in L/s and cfm.
6. ΔPs is the difference in static pressure from inlet to discharge of the unit.
7. ΔPs for terminal units with electric coil is equal to basic unit. Resistance of the coil elements is negligible.
8. ΔPt is the difference in total pressure from inlet to discharge of the unit.
9. For a detailed explanation of static and total pressure drop refer to page F64.
10. Pressure is given in Pa and in. w.g.
11. NC values are calculated based on typical attenuation values outlined in Appendix E, AHRI Standard 885-2008, "A Procedure for Estimating Occupied Space Sound Levels in the Application of Air Terminals and Air Outlets."

Typical Attenuation Values:

Radiated Sound

Total Deduction	Octave Band Mid Frequency, Hz.
All Sizes	125 250 500 1000 2000 4000

Discharge Sound

Total Deduction	Octave Band Mid Frequency, Hz.
<300 cfm	125 250 500 1000 2000 4000
300 – 700 cfm	24 28 39 53 59 40
>700 cfm	27 29 40 51 53 39

Performance Notes:

- Test data obtained in accordance with AHRI Standard 880-2011 and ASHRAE Standard 130-2008.
- Sound power levels include duct end corrections per AHRI Standard 880-2011. Please refer to page F25 for more details.
- Air flow given in L/s and cfm.
- Pressure is given in Pa and in.w.g.
- AHRI certified data is highlighted in blue. All other data are application ratings.
- Application ratings are outside the scope of the AHRI 880 Certification Program.
- Asterisks (*) indicate minimum static pressure of the unit exceeds the minimum operating pressure across the unit.
- Dashes (-) indicate sound power levels below 36-29-26-22-19-17 for each octave band; values below these sound power levels are considered below significance per AHRI 880.

Performance Notes:

- Test data obtained in accordance with AHRI Standard 880-2011 and ASHRAE Standard 130-2008.
- Sound power levels include duct end corrections per AHRI Standard 880-2011. Please refer to page F25 for more details.
- Air flow given in L/s

Performance Notes:

1. L/s, liters per second.
2. cfm, cubic feet per minute.
3. Pa, Pascals gauge.
4. Sound power levels expressed in decibels, (dB) re 10⁻¹² watts.
5. Sound power levels include duct end corrections per AHRI Standard 880-2011. Please refer to page F25 for more details.
