

RCD

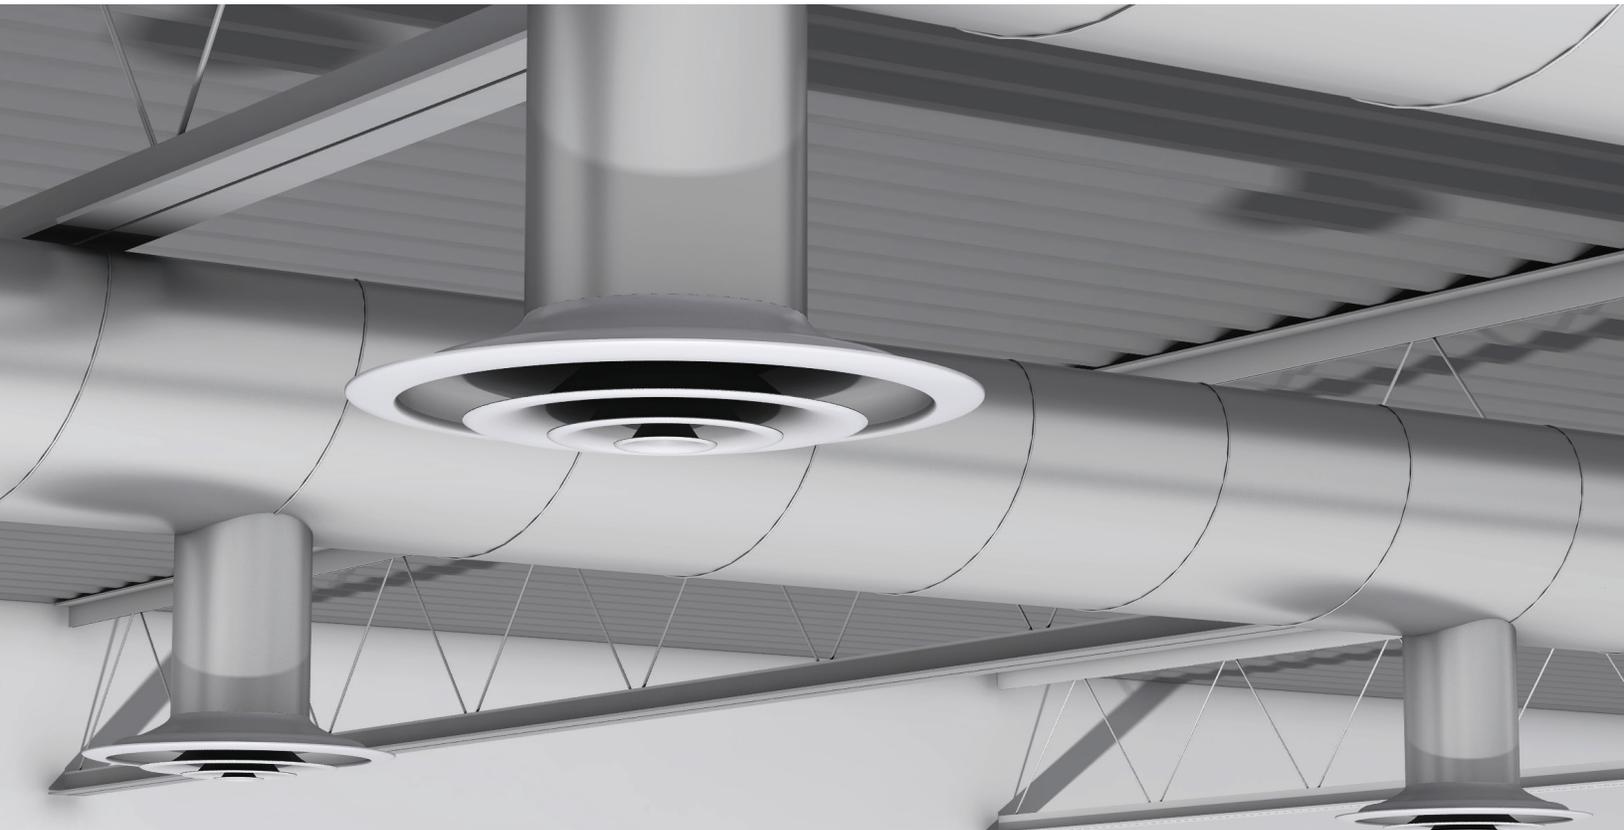

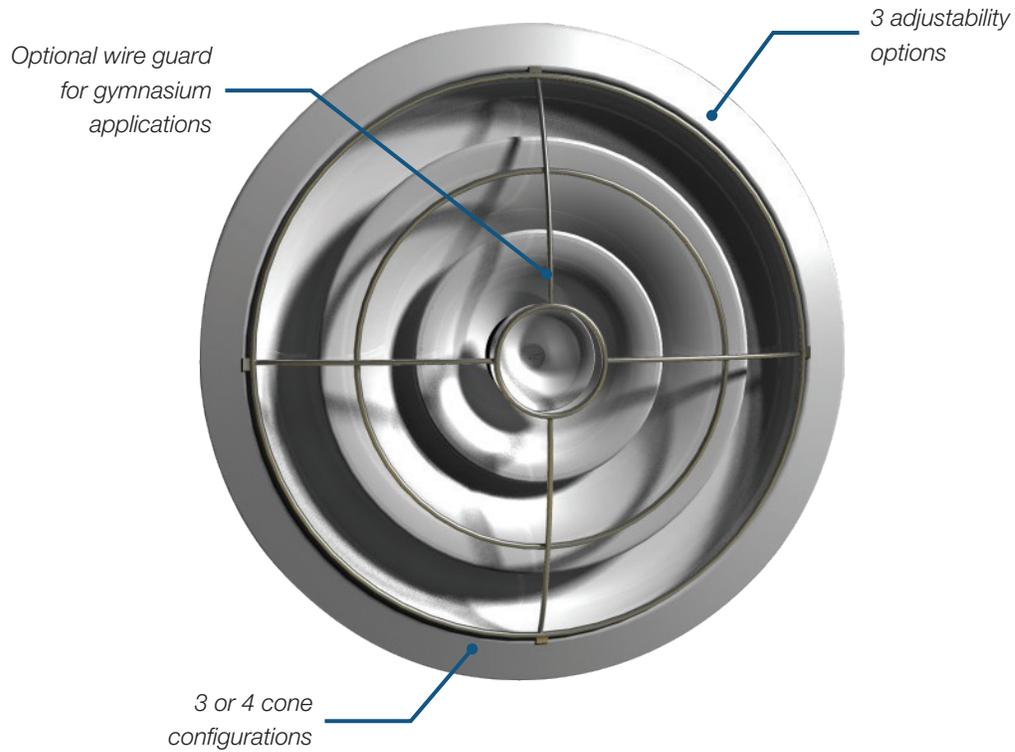

ROUND CONE DIFFUSER

RCD

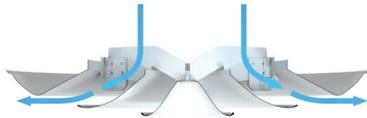

Round Cone Diffuser

Round Cone Diffusers (RCD) combine the visual appeal of a round cone design with maximum air diffusion efficiency. The RCD offers adjustable airflow with a variety of different adjustment methods allowing for the perfect balance between performance and economy.

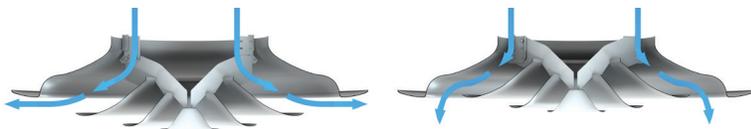

MULTIPLE CORE OPTIONS

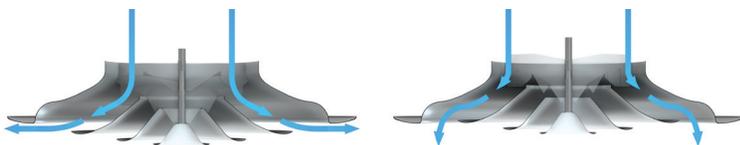

- + The RCD is available in three core styles, allowing for different degrees and methods of adjustability. With all options, the center cones move in unison to retain their relative position to minimize pressure drop and ensure uniformity under all conditions.
 - **2 position adjustable** – This model combines economy, simplicity and versatility in one unit and provides adjustment between two horizontal airflow patterns. The open position provides maximum airflow capacity while the closed position increases induction. A spring lock arrangement permits quick, easy removal of the inner cone assembly and access to the inner adjustment screw.

- **3 position adjustable** – This model can be adjusted between three distinct positions by removing the center cones, repositioning the mounting screws, and replacing the cones. The three positions provide vertical throw, horizontal throw for exposed duct mounting, and horizontal throw for surface mounting.

- **Fully Adjustable** – This model can be adjusted to provide anywhere from a fully horizontal to fully vertical air pattern, simply by turning the small center cone.

IDEAL FOR VAV OPERATION

- + The RCD can provide a tight horizontal 360° radial air pattern even at low flow rates, making the RCD an excellent choice for VAV applications.

TYPICAL APPLICATIONS

Ideally suited to exposed duct applications, Round Cone Diffusers provide a strong horizontal pattern, even without a ceiling present. Easily adjustable to provide both horizontal and vertical air patterns, performance of the RCD can be maximized for both heating, and cooling applications. Optional wire guards are available for grille protection in gymnasium applications.

CONSTRUCTION

- + Material
 - Steel (RCD/RCDA/RCDE)
 - Aluminum (ARCD)
- + Cones
 - 3 (RCDE)
 - 4 (RCD, RCDA, ARCD)
- + Size
 - 6 in. to 36 in.
- + Core Options
 - 2 position adjustable (RCDE)
 - 3 position adjustable (RCD/ARCD)
 - Fully adjustable (RCDA)
- + Options
 - Wire guards
 - Damper
 - Equalizing grid

PERFORMANCE DATA

RCD / RCDA - Four Cone - Horizontal

Performance Notes:

- Tested in accordance with ASHRAE Standard 70 – 2023 "Method of Testing for Rating the Performance of Air Outlets and Inlets."
- Air flow is in cfm.
- All pressures are in in. w.g.
- Throw values are measured in feet for terminal velocities of 150 fpm (minimum), 100 fpm (middle) and 50 fpm (maximum). If the diffuser is mounted on an exposed duct, multiply the horizontal throw value in table by 0.70.
- Horizontal throw data is based on supply air and room air being at isothermal conditions.
- NC values are based on room absorption of 10 dB re 10⁻¹² Watts and one diffuser. When used as a return air intake, the NC value given in the performance table will be increased by 5NC.
- Blanks "-" indicate an NC level below 15.
- "N/A" indicates this airflow is not recommended with this temperature differential.

Performance Notes:

1. Tested in accordance with ASHRAE Standard 70 – 2023 "Method of Testing for Rating the Performance of Air Outlets and Inlets."
2. Air flow is in cfm.
3. All pressures are in inches of water in in. w.g.
4. Throw values are measured in feet for terminal velocities of 150 fpm (minimum), 100 fpm (middle) and 50 fpm (maximum). If the diffuser is mounted on an exposed duct, multiply the throw value in table by 0.70.
5. Throw data is based on supply air and room air being at isothermal conditions.
6. NC values are based on room absorption of 10 dB re 10⁻¹² Watts and one diffuser. Values shown are for a horizontal pattern. Add 1 dB for a vertical pattern.
7. Blanks "-" indicate an NC level below 15.

Product Improvement is a continuing endeavour at Price. Therefore, specifications are subject to change without notice. Consult your Price Sales Representative for current specifications or more detailed information. Not all products may be available in all geographic areas. All goods described in this document are warranted as described in the Limited Warranty shown at priceindustries.com. The complete Price product catalog can be viewed online at priceindustries.com.
