ENGINEER TOOLKIT
A SET OF INNOVATIVE TOOLS TO ACCELERATE YOUR WORKFLOW

Our cloud services can integrate directly into your **Excel and Revit projects.**
Access real-time performance data and calculations to boost your accuracy and efficiency.

FOR **EXCEL**

The Excel Performance Generator is a free cloud-based Excel plug-in. This tool provides a suite of custom functions and tools that allow you to work with our rich and dynamic product information, including performance data, directly within your spreadsheets.

FOR **REVIT**

Price is pleased to offer two free Revit plugins. The Price Revit Catalog connects you to our entire product family library. Search for products using the search, application-based filters, and competitor cross-reference tools. The Ripple HVAC Tool allows you to automate diffuser and VAV selection and layout, and has built-in load calculations to enhance the efficiency and precision of your project.

Price Revit content is also available on these widely used tools: BIMobject, and CTC's Nexus Suite and MEPPP software.

PRICE

ENGINEER TOOLKIT
A SET OF INNOVATIVE TOOLS TO ACCELERATE YOUR WORKFLOW

PRICE | EXCEL PERFORMANCE GENERATOR
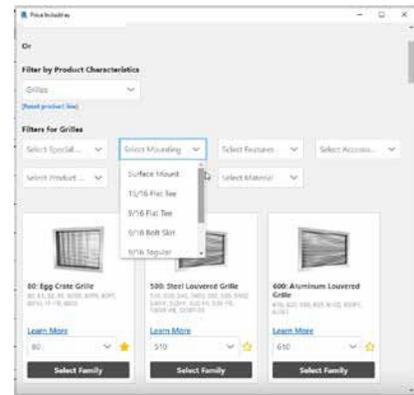

Compatible with Excel 365 and Excel 2019-Present

+ **Competitor Cross Reference:** includes product cross reference to dozens of manufacturers in air distribution.

+ **Terminal and Fan powered unit schedules:** utilize pre-built templates to quickly generate complete terminal unit and fan powered unit schedules with catalog performance data. Or use the performance functions to create customized schedules that match your existing templates.

+ **Grille and Diffuser schedules:** create a table with grille or diffuser performance at any operating point within catalog ranges.

+ Search for the **Price Engineer Toolkit on the Microsoft App Store** to download the plugin.

## PRICE | REVIT PRODUCT CATALOG

Compatible with Revit 2020-Present

+ **Download all Price Revit families:** and load into a Revit project directly within Revit. You can also favorite products for easier, faster access.

+ **Competitor Cross Reference:** includes product cross reference to dozens of manufacturers in air distribution.

+ Search for the **Price Engineer Toolkit on the AutoDesk App Store** to download the plugin.

RIPPLE
AUTOMATED BUILDING DESIGN

Compatible with Revit 2019-Present

+ **Air Terminal Selection and Placement Tool:** auto size and layout 2x2 ceiling diffusers. Create custom built-in schedules for grilles, registers, and diffusers.

+ **Auto Zoning:** automatically zone AHUs based on ASHRAE 62.1 Space Types. Zones VAV automatically based on load, adjacency, and max spaces to a zone.

+ **VAV AutoSelect:** use Price cloud-based AHRI tested performance data to auto select and size VAVs for each zone.

+ Search for the **Ripple HVAC Toolkit on the AutoDesk App Store** to download the plugin.
